Synalloy Corporation
Notes To Condensed Consolidated Financial Statements
(Unaudited)

\section*{NOTE 1--BASIS OF PRESENTATION}

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation \(S-X\). Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and nine-month periods ended September 30,2000 are not necessarily indicative of the results that may be expected for the year ending December 30, 2000. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the period ended January 1, 2000.

NOTE 2--INVENTORIES

Inventories are stated at the lower of cost (first-in, first-out method) or market.

NOTE 3--LEGAL MATTERS
The Company is from time-to-time subject to various claims, other possible legal actions for product liability and other damages, and other matters arising out of the normal conduct of the Company's business. Management believes that based on present information, it is unlikely that liability, if any, exists that would have a materially adverse effect on the consolidated operating results or financial position of the Company.

NOTE 4--COMPREHENSIVE INCOME
Comprehensive (loss) and income was (\$515,000) and \(\$ 1,683,000\) for the three and nine months ended September 30, 2000, respectively. Comprehensive income consists of net income less unrealized losses on the Company's foreign equity investment, of \(\$ 187,000\) and \(\$ 260,000\), net of deferred income taxes of \(\$ 101,000\) and \(\$ 141,000\) for the three and nine months ended September 30, 2000, respectively, and is recorded in Shareholders' Equity.

NOTE 5--ACCOUNTING FOR DERIVITIVE INSTRUMENTS AND HEDGING ACTIVITIES
The Company does not have any material derivative instruments nor does it participate in hedging activities, therefore management believes the adoption of Financial Accounting Statements 133, 137 and 138 will not have a material impact of the financial statements of the Company.

NOTE 6--SEGMENT INFORMATION
During the first quarter of 2000 , the Company completed the reorganization of its Chemicals Segment changing the Segment into two separately managed product groups - Colors and Specialty Chemicals. Previously, the Segment had been managed by geographic location. The amounts presented for the third quarter and nine months of 1999 have been restated to reflect the reorganization.

\section*{Synalloy Corporation}

Management's Discussion And Analysis Of Financial Condition And Results of Operations

The following is management's discussion of certain significant factors that affected the Company during the quarter ended September 30, 2000. (Dollar amounts are in thousands except for per share data.)

Consolidated sales decreased 20 percent and increased three percent, respectively, for the quarter and year-to-date compared to the same periods one year ago. The Company had a consolidated net loss for the quarter of \(\$ 328\) compared to net income of \(\$ 830\) for the third quarter of 1999. However, consolidated net income year to date was up 30 percent to \(\$ 1,943\) compared to \(\$ 1,493\) compared to the same period one year ago.

Metals Segment sales decreased 26 percent and operating income declined 34 percent for the quarter. Sales year-to-date increased 12 percent and operating income increased over twice the level of the prior year. The decline in dollar sales in the quarter resulted from 42 percent lower unit volumes that were partially offset by a 27 percent increase in average selling prices. Unit volumes were also down the same 42 percent on a sequential quarterly basis. This is the steepest quarterly decline in unit volumes in management's memory. The decline appears to be caused by inventory liquidation resulting from lower prices for flat-rolled stainless steel and stainless pipe because of surcharge reductions that began in August. The surcharges reflect changes in the cost of certain raw materials, primarily nickel, that are added to the base price by the flat-rolled producers. The surcharge to be effective at the beginning of each month is announced in advance. This results in monthly price volatility that motivates distributors to add to inventories ahead of surcharge increases and reduce inventories ahead of surcharge decreases. If the decline in unit volume is not due to lower-end use demand but is the result of destocking, as industry sources believe, sales should recover quickly when distributor inventories are depleted.

Chemicals Segment sales decreased 11 and nine percent in the quarter and year-to-date, respectively, with both Colors and Specialty Chemicals contributing to the decline. The third quarter is traditionally the worst for the Textile Colors Group but management is nonetheless disappointed with the 13 percent decline in sales from a year earlier and the significant operating loss
experienced during the quarter. The domestic textile color business can only be described as brutally competitive. Both unit volume demand and sales prices can't seem to find a bottom. An unavoidable consequence of price declines is inventory losses that lead to lower profit margins. This business will continue to be under pressure as long as the domestic textile industry continues to shrink because of imports from low wage countries. Management's focus is to consider all alternatives to generate a reasonable return on the capital utilized in this business.

The Augusta plant suffered a \(\$ 539\) operating loss in the quarter and has incurred \(\$ 1,434\) in losses for the first nine months of this year, which represents most of the loss of the Specialty Chemicals Group. Site preparation is underway in Spartanburg for the move of equipment from Augusta. The move should be completed by year-end after which the Augusta plant losses will be eliminated and profits in Spartanburg should be enhanced by improved utilization. However, the Company expects to take a restructuring charge in the fourth quarter, which has not been quantified. The Spartanburg plant also had a loss for the quarter as a result of lower than expected production. Management plans to bring expenses in line with production volume by year-end.

Synalloy Corporation
Management's Discussion And Analysis Of Financial Condition
And Results Of Operations - Continued

Selling and administrative expense for the quarter and year-to-date were ten percent of consolidated sales, respectively, compared to last year's ten percent.

Cash flows from operations totaled \(\$ 231\) during the first nine months of 2000 compared to \(\$ 3,239\) generated during the same period one year ago. The decrease in cash flows came primarily from an increase in inventories and a decrease in accounts payable, offset by a decrease in accounts receivable totaling \(\$ 4,382\) in 2000, compared to a net decrease of \(\$ 2,837\) from the same accounts in 1999 . In addition, a decline in income taxes payable in 2000 of \(\$ 526\) compared to an increase of \(\$ 981\) in 1999 contributed to the decline. The Company used part of the cash flows generated in 2000 and short term borrowings to purchase 52,700 shares of the Company's common stock for \(\$ 1,307\). The Company expects that available cash and existing lines of credit will be sufficient to meet normal operating requirements, including capital expenditures and payment of dividends over the near term.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

The statements contained in this management discussion and analysis that are not historical facts may be forward looking statements. The forward looking statements are subject to certain risks and uncertainties, including without limitation those identified below, which could cause actual results to differ materially from historical results or those anticipated. Readers are cautioned not to place undue reliance on these forward looking statements, which speak only as of their dates. The following factors could cause actual results to differ materially from historical results or those anticipated: adverse economic conditions, the impact of competitive products and pricing, product demand and acceptance risks, raw material and other increased costs, customer delays or difficulties in the production of products, and other risks detailed from time to time in Synalloy's Securities and Exchange Commission filings. Synalloy Corporation assumes no obligation to update the information included herein.
